

The Sacred Chain

By James Stump

KUPERARD

PUBLISHERS

A thought-provoking and eye-opening work in the vein of *Sapiens*, *Walking the Bible*, and *The Language of God* that offers a compelling argument for how science is not only compatible with faith, but can enrich it.

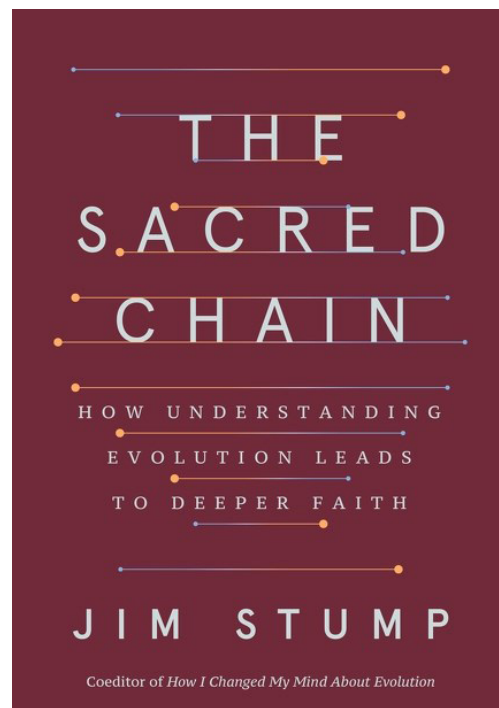

For more than a century, philosophers and scientists have wrestled with reconciling evolution and religion, a debate that continues today. James Stump is both a man of science and a man of faith. In this moving and deeply thoughtful book, he shows Christians a hopeful way forward out of the morass.

The Sacred Chain seeks to open the dialogue between theology and science, to be a bridge to understanding and a view of God and nature that encompasses both. Stump draws on philosophy, theology, and the latest scientific research to tackle some of the biggest questions facing humanity and people of faith today, involving issues such as:

- How to consider the Bible
- How to understand the long history of the universe
- How a mind or soul could have evolved
- How evolution factors into faith
- How a species is defined
- How a good and loving God could create a world rife with pain

Deeply researched, wonderfully accessible, and both intellectually and emotionally engaging, *The Sacred Chain* provides clarity in our uncertain times, revealing a bigger picture of our world and our place within it.

James Stump is Vice President at BioLogos and host of the podcast *Language of God*. A former professor, he has a PhD in philosophy and his books include *Four Views on Creation, Evolution, and Intelligent Design*; *Science and Christianity: An Introduction to the Issues*; and *The Blackwell Companion to Science and Christianity*. He lives in Goshen/South Bend, Indiana.
